Adept Front End Developer with a proven track record at Freelancer, enhancing web usability and efficiency through expert application of HTML, CSS, and JavaScript, Nextjs including React.js. Excelled in responsive design and cross-browser compatibility, significantly boosting user engagement. Renowned for collaborative project leadership and mentoring junior developers, showcasing unparalleled problem-solving and team-building skills.

Experience

Developed reusable UI components using modern JavaScript frameworks like React or Nextjs, increasing productivity of the entire development team.

Implemented responsive design principles to ensure optimal display on various devices, improving overall usability for users on both desktops and mobile devices.

Collaborated with UX designers to create seamless user interfaces for web applications.

Collaborated closely with back-end developers to integrate RESTful API endpoints into front-end architecture seamlessly.

Reduced page load time significantly with advanced optimization techniques like lazy loading, minification, and caching strategies.

Streamlined codebase by refactoring and modularizing CSS, HTML, and JavaScript files.

Led front-end development projects from inception to completion, resulting in successful launches of various web applications.

Managed source code effectively using Git branches, pull request reviews, and merge conflict resolutions.

Integrated third-party APIs to enhance functionality and improve overall user experience across multiple platforms.

Mentored junior developers by providing guidance on best practices and industry standards in front-end development.

Stayed up-to-date on industry trends and emerging technologies to continuously improve skills and provide innovative solutions for clients.

Contributed valuable input during project planning and design phases, resulting in a more efficient development process.

Developed custom themes and templates for content management systems such as WordPress and Drupal.

Optimized website performance through rigorous testing, analysis, and iterative improvements based on real-time data insights.

Ensured high-quality user experiences by rigorously testing application features against diverse user scenarios before

deployment.

Enhanced user experience by optimizing website performance and implementing responsive designs.

Established version control processes using Git to maintain clean codebases and facilitate efficient collaboration among team members.

Increased website accessibility by ensuring compliance with WCAG 2.0 guidelines.

Implemented progressive web app technology to improve mobile user experience and increase engagement rates.

Debugged complex cross-browser compatibility issues, ensuring consistent appearance and functionality across all major browsers.

Produced websites compatible with multiple browsers.

Coded using HTML, CSS, and JavaScript to develop features for both mobile and desktop platforms.

Designed and updated layouts to meet usability and performance requirements.

Researched emerging web technologies and trends for possible incorporation into sites.

Contributed to projects within Scrum project management environments.

Developed user-friendly web forms with validation and error handling.

Optimized web applications for speed, scalability and security.

Completed full redesigns of existing websites to improve navigation, enhance visuals and strengthen search engine rankings.

Reviewed code to validate structures, assess security and verify browser, device and operating system compatibility.

Developed user-oriented visuals and features using front-end languages to increase site traffic.

Crafted SEO strategy and intuitive interface for site to achieve prominent rankings across top browser platforms.

Collected, defined and translated user requirements into project designs and implementation plans.

Collaborated with in-house web designers to create sleek and innovative UI design.

Created powerful Content Management Systems to serve as interface for client.

Conducted unit testing to deliver optimal browser functionality.

Designed and executed security measures such as firewalls and encryption.

Delivered user support to clients to train, educate and answer questions.

Employed coding practices based on commonly accepted standards to establish site layout and user interface.

Spearheaded production of page content such as visuals and text copy to meet project specifications.

Maintained strict budgetary and scheduling guidelines to satisfy customers with high-quality, targeted designs.

Performed unit testing of web applications and troubleshoot issues.

Conceived and built optimized landing pages in HTML and CSS for integration and cross-browser compatibility.

Planned and engineered RESTful web services to manipulate

dynamic datasets.

Boosted web traffic by improving navigation and rectifying bottlenecks.

Took concepts and produced design mockups and prototypes to strengthen designs, enhance user experiences and improve site interactions.

Proved successful working within tight deadlines and a fast-paced environment.

Skills

- *JavaScript*
- *CSS*
- *HTML*
- *Front end web development*
- *React.js experience*
- *HTML5 expertise*
- *CSS proficiency*
- *Bootstrap framework*
- *Web design*
- *Responsive design*
- *Git proficiency*
- *Code debugging*
- *Web components development*
- *UX design*
- *Web application development*

- *Figma proficiency*
- *Front-end frameworks*
- *Front-end skills: HTML, CSS*
- *Responsive web design*
- *Modular CSS*

Education

Expected in March 2032

Virtual University Islamabad, Pakistan

Bachelor of Software Engineering
